

MSDS for HUDSON POLISHING CLOTHS

The OSHA Hazardous Communication Standard (29CFR 1910.1200) specifically excludes what is referred to as "Articles." The definition of an article is as follows:

- (i) Which is formed to specific shape or design during manufacture,
- (ii) Which has end use function(s) dependent in whole or in part upon its shape or design during end use; and
- (iii) Which does not release, or otherwise result in exposure to, a hazardous chemical under normal conditions of use.

Since all HUDSON polishing cloths and double sided adhesive discs fall under this exclusion, Material Safety Data Sheets are not required
